GWBSM: Some Questions

- Favourite BSM scenario?

    - strings? phase transition? domain walls? other?

- Most promising GW signature?

    - SGWB? Sources? ...?

- Most important non-GW constraints?

    - PBHs? Colliders? ...?

- How can BSM calculations be improved?

- Most promising experiment(s)?

    - LVK/ET/CE? LISA? PTAs? deciHz? high-frequency? ...?

- Prospects for improvement in near future (next 5 years)?
